TransactionTargetApp.java

Run

Share

```
23 boolean achieved = false;
24
25 for (int i = 0; i < size; i++) {
26     sum += transactions[i];
27     if (sum >= target) {
28         System.out.println("Target achieved after "
29             + (i + 1) + " transactions");
30         achieved = true;
31         break;
32     }
33
34 if (!achieved) {
35     System.out.println("Given target is not
36         achieved");
37 }
38 }
```

Output

Clear

```
enter the size of transaction array
3
enter the values of array
20 12 31
enter the total no of targets that needs to be achieved
2
enter the value of target
21
Target achieved after 2 transactions
enter the value of target
19
Target achieved after 1 transactions

=== Code Execution Successful ===
